

# WHITEMOSS LANDFILL LIMITED

## Company Environmental Policy Statement

The Directors of Whitemoss Landfill Limited are committed to continuing the achievement of the following environmental policy objectives throughout the design, operation and restoration or after use of all sites.

- 1 To ensure the continuous improvement of its environmental management system by implementing a programme of regular audit and annual review of the environmental management system.
- 2 To ensure that all schemes are designed and operated incorporating measures to prevent pollution by avoiding, reducing or controlling emissions to an acceptable level. Adverse environmental impacts are minimised and environmental benefits are maximised throughout all stages of the development.
- 3 To implement schemes incorporating measures to protect existing significant ecological features and create a variety of new habitats to enhance the environmental quality of completed sites.
- 4 To adopt best practice to ensure compliance with both environmental legislation and high environmental standards.
- 5 To monitor noise, air and water quality, visual appearance and ecology at all waste sites and compare with predicted impacts.
- 6 To identify where continuous improvement is required by maintaining a procedure to log and where possible, remedy any environmental complaints received from the local community or employees.
- 7 To conserve environmental resources we will endeavour to:
  - a) minimise the production of waste and where economically viable, ensure waste materials are re-used or recycled;
  - b) use energy efficiently;
  - c) implement a purchasing policy which identifies plant and machinery which has the least adverse environmental impact.
- 8 To produce an annual report on the company's environmental performance to include the results of environmental monitoring, audits and complaints.
- 9 To ensure that all Whitemoss Landfill Limited employees receive a copy of this Policy and are trained to perform their duties in line with its requirements.

We take care to control any impact from noise and vibration or emissions to air, water or ground. We also minimise the visual impact and any effects on ecosystems and cultural heritage. We remain committed to our policy of development with care.
